Retail systems Fire ratings - Aug. 2010

The following are results of the ASTM E84 standard method for test for surface burning characteristics of building materials. Copies of complete test results are available upon request.

Note: Flame spread dictates class:
    I or A : 0-25
    II or B : 26-75
    III or C : 76-200

N/A indicates that product was not tested

This information supersedes all data previously published

** Note: the use of fire rated core will reduce the load capacity
of the system. You will need to determine if it meets your needs.

Surface tested	Class		Flame Spread		Smoke Developed	
	Slatwall Non-inserted	Slatwall Aluminum insert	Slatwall Non-inserted	Slatwall Aluminum insert	Slatwall Non-inserted	Slatwall Aluminum insert
