Use Marlite Designer Wall Systems to define space while adding your own artistic signature. Marlite's extensive array of products for Primary Spaces makes installing panels on vertical surfaces simple. Each system provides design flexibility to create the perfect wall presentation.

Surface Systems®

Your most versatile ensemble of surface materials, finishes and colors, with pre-engineered clip application hardware and trim options. See Page 8

■ Modules TM

Interior wall system comprised of 15 standard square and rectangle panel sizes – engineered with tongue and groove joinery to form fine detailed grid patterns. See Page 18

Durable High Pressure Laminate (HPL) wall system offering an array of panel sizes, configurations and reveal types for a strong, secure installation. See Page 24

▲ Wood Veneers see page 29

Automated stain and top coat precision applied to the most select AA grade veneer.

X Azure ™ Woods see page 33

Exclusive imaging process creates real wood brilliance without the environmental impact.

Marlite Finish see page 37

Richly detailed wood grain prints are economical and easy to maintain.

Metal Panels see page 40

Wide ranging palette varies from soft and natural to dominant and bold.

Phenolic-Ultra Durable see page 42

Beautiful and ultra-tough compact laminates offer the ultimate in wall protection.

High Pressure Laminates see page 42

Thousands of laminates are available from all the major national brands.

Additional Capabilities see page 42

Photo murals, decals, graphic images, tackable surfaces and fabric acoustic panels.

Is a contemporary modular wall panel system featuring 3/4" thick panels that are easily attached to a subwall using Marlite's clip application system. Surface Systems provide the most effective means of applying a wide range of natural materials and faux finishes to flat and radius walls.

Features and Benefits

- Select from a wide range of natural materials and faux finishes used together or separately to provide tremendous design flexibility.
- 3/4" thick panels easily attach to a subwall using our clip system. The mechanically applied panel (MAP) system requires minimal adhesive.
- All projects are individually manufactured to specification, allowing control of panel layouts, sizes, materials and finishes.
- Engineered components handle most architectural details including radius walls.

Panel Sizes – Per specification. Minimum size 8" x 8"

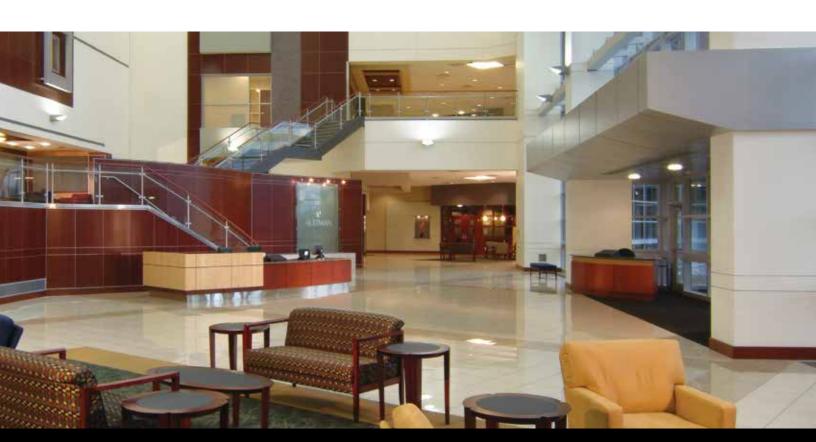

Maximum size 16 Sq. Ft.

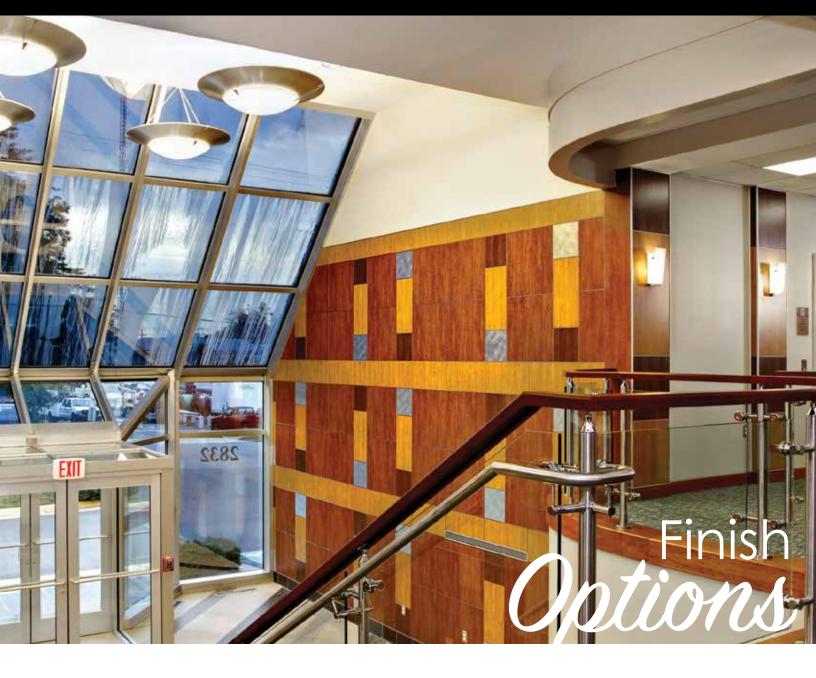

Panel Thickness - 3/4" MAP System

1/4" Adhesive System 3/8" MAP Ultra Durable

Panel Construction - Finish/Face, Medium Density Fiberboard (MDF) core, backer (if necessary)

Class A Fire-Rating is available.

Reveal Options

1/16" Hidden Reveal Horizontal and Vertical

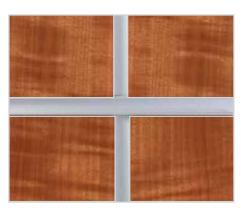

1/2" Channel Reveal Horizontal, 1/4" Narrow Reveal Vertical

1/2" Channel Reveal Horizontal and Vertical

1/4" Narrow Reveal Horizontal and Vertical

1" Broad Reveal, Horizontal and Vertical

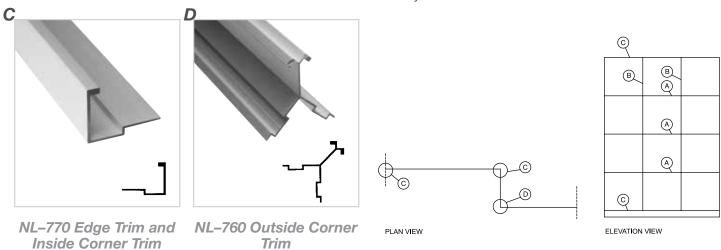

Note: Horizontal edges are square cut, vertical edges are kerfed to accept cross splines.

Trim and Hardware Options

(Black only)

NOTE: 10' lengths unless noted, available in clear satin anodized and black satin anodized. *Available in 8' only.

Available in clear satin anodized and black satin anodized, Surface Systems offers a wide variety of trim options, enabling you to finish your application with the perfect details.

Marlite offers alternative systems for special application requirements.

- Surface Systems Radius Wall
- Surface Systems 375 Ultra Durable
- Surface Systems 1/4" Adhesive Systems

Horizontal Main Rails fasten to the subwall. Clips, pre-applied to specially machined panels, attach to the Main Rail. Vertical Cross Splines lock adjacent panels together.

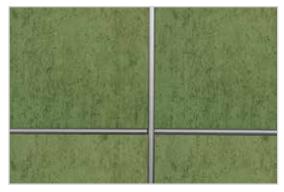

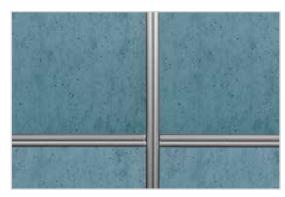

Surface Systems Radius Wall

Available in 3/4" MAP system only; Surface Systems Radius Wall is a pre-engineered system designed for easy installation and includes all molding and trim components. Radius Wall gives you the flexibility to choose from a variety of finishes including wood and metal veneers, laminates and painted finishes. Flexible Horizontal Cross Spline provides convex and concave curves with a minimum 10' radius and seamless transition from straight to curved walls.

Surface System Radius Wall Reveal Options:

1/4" Narrow

1/2" Channel

Flexible Horizontal Main Runners

1/4" Narrow

1/2" Channel

Vertical Main Rails

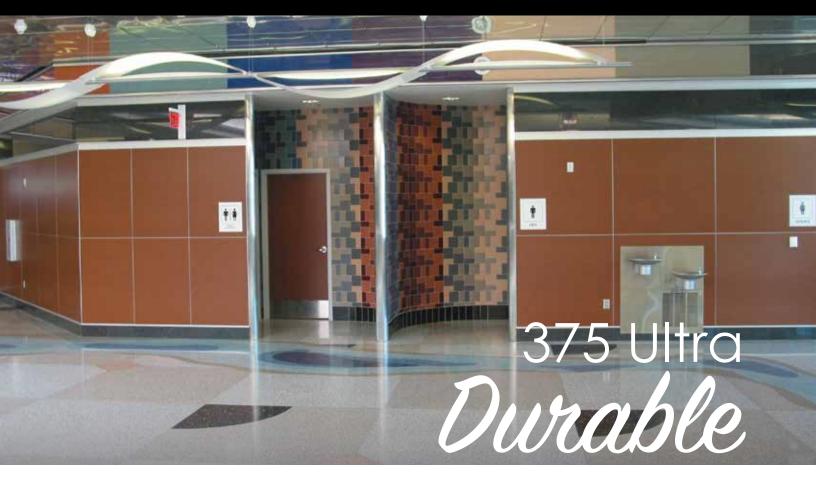

Trim available in black or satin finish. Edge trim and inside outside corners available.

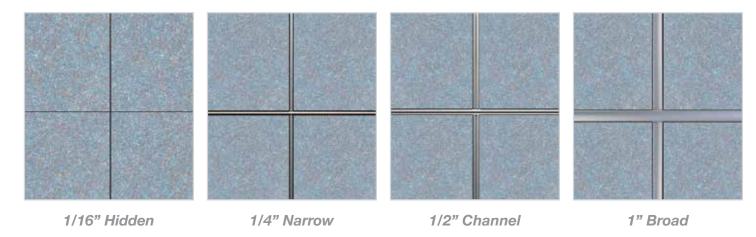

Surface Systems 3/8" Ultra Durable Panel System. Tough, impact resistant compact phenolic laminate panels installed with Marlite's proven, pre-engineered, mechanically applied panel (MAP) Surface Systems.

Solid compact phenolic laminate is the industry's toughest panel, available in many woodgrains, colors and patterns. Thin panel reduces weight and minimizes cost.

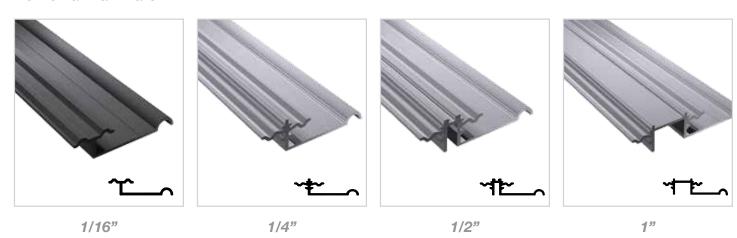

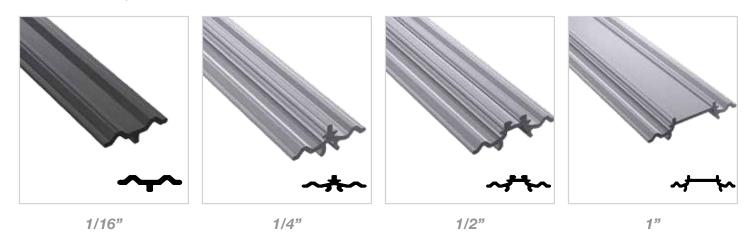

MAP 375 Ultra Durable Reveal Options:

Horizontal Main Rails

Vertical Cross Splines

Trim available in black or satin finish. Edge trim and inside outside corners available.

Surface Systems 1/4" Architectural System. Thinner panels are ideal for renovations and columns. Horizontal Mainrunners and Vertical Crossrunners attach to subwall. Panels are applied using adhesive. Only available with Marlite Finish, Azure or Metal Panels. Required adhesive: C-109 Marlite Premium Adhesive (29 oz. cartridges)

1/4" Adhesive System Horizontal Main Runners + Vertical Cross Runners

1/2" Channel 1/4" Narrow

■ Modules [™]

Modules are 1/2" thick panels with engineered tongue & groove joinery that fit together to form finely detailed grid patterns on walls. With fifteen standard square and rectangle sizes, Modules can be mixed and matched to create virtually limitless wall configurations.

Features and Benefits

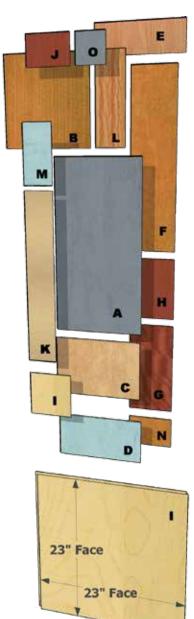

- Mix and match panel sizes and finishes to create dynamic wall configurations.
- 1/8" square and 1/4" chamfered reveal options provide design flexibility.
- Engineered tongue & groove joinery and easy-to-handle panel sizes make glue-up installation simple.

Panel Sizes -

	Center-to-Center Sizes

- Chalkboard see page 46
- Tackable Surfaces see page 46

Sieva is a durable High Pressure Laminate (HPL) wall system using 7/16" panels for a stable and secure installation. Four different reveal options and multiple panel sizes and configurations provide the template for artistic wall design, easily and affordably.

Features and Benefits

- Attractive and durable wall panels are ideal for heavy traffic commercial areas.
- Pre-engineered reveals make installation quick and easy. Panels may contain kerfs on one or more sides.
- HPL finishes used in conjunction with battens provide a tough, easy to clean surface.
- Multiple fire-rating classifications meet the most stringent requirements for public spaces.

Panel Sizes – Any panel size smaller than

maximum 4' x 10'. Panels can be fabricated at the factory or the job site.

Panel Thickness - 7/16"

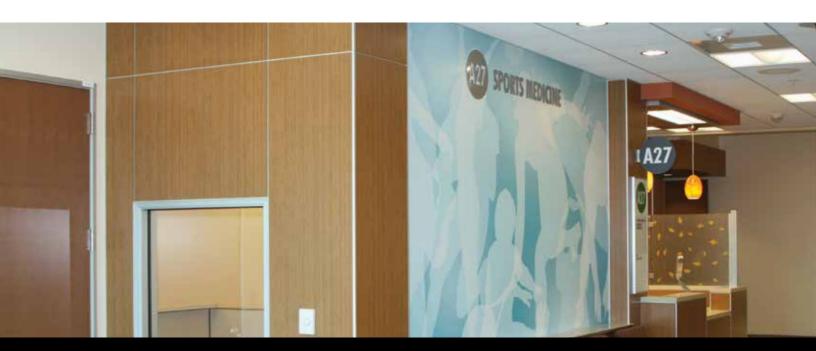

Panel Construction - HPL face, MDF core,

balancing backer

Marlite Wood Veneers are unparalleled for two important reasons.

- We select only superior veneers far exceeding the industry standard AA grade. All our Forest Stewardship Council (FSC) certified veneers meet the most stringent requirements for quality.
- Marlite utilizes automated sanding and precision coating technology that ensures consistency and durability. By using transparent dye stains and clear topcoats with a choice of gloss level, the beauty of every veneer is optimized. We also offer customized stain colors to achieve any desired hue.

These finishes are available in 3/4" Surface Systems (SS) and Modules (MMD). When specifying a finish, please add system designation. For example: SS 8103 Anigre (Fiddleback).

These finishes are available in 3/4" Surface Systems (SS) and Modules (MMD). When specifying a finish, please add system designation. For example: SS 8113 Makore.

Azure Woods apply Giclee (pronounced zhee, clay) imaging – accepted and renowned in the world of fine art reproduction – to the most select substrates. The result is an image quality with realism inseparable from more expensive, natural veneers.

The method produces consistency of color and tone far beyond the capability of any standard millwork offering. The eco-responsible finishing system and an eco-friendly substrate combine to have low environmental impact. With Azure Woods, Marlite can provide Architects and Designers beautiful, luxurious interiors that will become signatures of their work.

Azure[™] Environmental Woods Offer:

- Inseparable realism
- · Consistent colors
- Low earthly impact

Azure Wood's Breakthrough Multi-Step Finishing Process

Giclee imaging reproduction combined with Marlite's superior installation technology creates stunning interiors.

These finishes are available in Surface Systems (SS) and Modules (MMD). When specifying a finish, please add system designation. For example: SS 3101D Anigre (Quartered).
