

Tough surface prevents wall damage.

Eliminates the need for spot repairs.

The easiest, most affordable way to apply HPL to walls.

Stands up. To just about anything.

Wall protection for high traffic areas.

What is HPL-Faced FRP?

The ultimate in wall protection, High Pressure Laminate (HPL)-faced FRP is an exceptionally wear resistant panel. It is created through an exclusive process of thermally bonding melamine impregnated surfacing materials directly to the FRP core. Designed to match and coordinate with popular high pressure laminates, the panels are available in a wide array of woodgrains, solid colors and abstract prints.

Scratch Resistant Test

ASTM D2197

Competitive Rigid Plastic Wall Panel

HPL-faced FRP Panel

Impact Test

ASTM D5420-04 product on 1/2" drywall

Rigid plastic wall panel Complete structural failure

HPL-faced FRP wall panel nominal damage

Panel Information

Panel Sizes

Panel Dimension - 47.5" x 95.5" x 3/32" (nominal)

Class A and Class C fire-ratings.

Material conforms with NFPA Life Safety Code Class A fire rating.

Installation

Using suggested trowel, spread adhesive for 100% coverage within 2" from each edge.

Apply a 1/4" thick bead of Marlite C-109 Cartridge Adhesive 3/4" in from edges and cutouts.

Flex panel to fit in trim and press in place.

Press & roll from center over entire panel.

Use only approved adhesives and sealants.
