

# Volta™

## Dimensional Flex Sheets

Lightweight panels are only ¼ pound per square foot and are flexible enough to be shipped in roll form.

Thermoplastic panels offer protection from UV damage and most chemicals.

Panels are easy to cut and are simply applied to the wall using adhesive.

18 featured pattern designs and 18 finish options combine to maximize design possibilities.

# Take your walls to another dimension.

Easily add distinction to your walls, counters, ceilings, and more!

# Volta™ Dimensional Flex Sheets

Volta Dimensional Flex Sheets are lightweight, flexible thermoplastic sheets that become rigid when bonded to a surface. Available in 4' x 8', dynamic dimensional patterns and vivid finishes you can see and feel. Volta Dimensional Flex Sheets are quick to install and easy to clean.

**Steel Strata**

**Winter White**

# Other Applications

## Ceiling Panels

## Counter Accents

## Trim Options

Coordinating trim is available for each finish.

Panels are flexible and can contour but become rigid once installed.

## Installation

Volta Dimensional Flex Sheets can be cut with simple shears or a razor knife. The panels are applied to the wall using adhesive.

Apply Marlite adhesive evenly to the wall using a trowel.

Starting with the bottom of the panel, apply to the wall.

Press the panel against the wall.

Apply pressure evenly on the different parts of the panel to ensure adhesion.
