

Ceilings are no longer considered a flat, white plane but a canvas for expression. When treated properly, ceilings can become the focal point of a room. They have the ability to expand or contract a space, making a cavernous hall seem more intimate or creating a feeling of openness and light in an area with low ceilings.

Volta Flex Ceiling Tiles are opaque, thermoplastic square and rectangular panels available in a wide range of patterns, finishes, and styles. Available in three ceiling tile options.

## Ceiling System

### Glue-Up

Designed with an overlap system to make installation easy, fast, and forgiving. Glue-Up tiles can be used on both the ceiling and the wall. Available as 2' x 2' and 2' x 4' sizes.

### Lay-In

Designed to lay inside 15/16" grid systems. Certain patterns are available as a tegular option, where the embossed part of the design is lower than the suspension grid, and the 4 edges are flat to fit nicely into the grid.

### Acoustic/Perforated

2' x 2' Lay-In tiles, perforated to increase sound absorption and offer acoustic qualities as well as all other 2' x 2' Lay-In tile features.

## Technical Information

### Fire Retardant

Test: ASTM E-84  
Results: Class A

### Fungi

Test: ASTM 621

### Humidity

Results: 12 hrs 96-100% RH @ 40° C on MDF

### Noise Reduction Coefficient

Test: ASTM C423 + SAE J2883 MEK Double Rubs/  
Crockmeter  
Results: withstands 70 cycles
