

Symmetrix™ SmartSeam FRP Panels

SmartSeam eliminates traditional panel joints for a clean, continuous look.

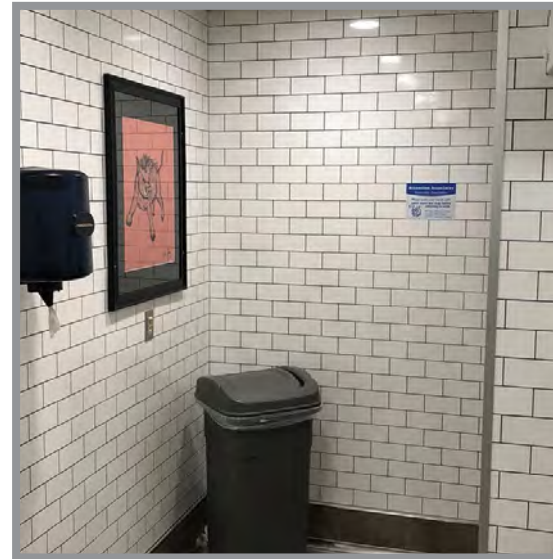

Stunning tile look, without the hassle and cost of tile.

Symmetrix™ SmartSeam FRP

Symmetrix™ SmartSeam FRP tile panels bring vibrancy to any space and are the ideal solution for covering old or damaged ceramic tile. Initially a smooth FRP panel, Symmetrix is physically grooved with state-of-the-art CNC equipment to emulate the look and depth of tile with grout. Whether you're planning a new construction or a commercial retrofit, these faux tile panels are:

- Ultra thin (3/32") and easily install over nearly any surface in hours, not days.
- Sealed with a durable, proprietary sani-coat for unmatched resistance to stains, mold, and mildew.
- Simple to clean and maintain.
- Crack and impact resistant.
- Available in 4'x4' or 4'x8' tile wall panels and custom patterns.

Features & Benefits

Installs in hours, not days, over most any surface.

Doesn't crack like ceramic tile grout and resists stains, mold and mildew.

Fiberglass core provides serious impact resistance.

Sani-coat sealer makes the entire surface easy to clean.

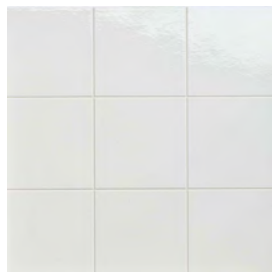

Universal Tile Patterns

Symmetrix SmartSeam is available in five standard color combinations and five universal tile patterns. Standard colors include: White panel with white grooves, white panel with black grooves, black panels with white grooves, white panels with grey grooves, and grey panels with white grooves. No division molding required.

Panel Specifications

Substrate: Fiberglass Reinforced Plastic (FRP)

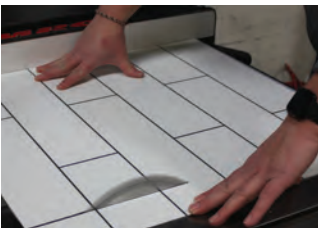

Panel Dimensions: (Nominal Panel Sizes)

- SmartSeam Subway: 4' x 4', 5' x 3', and 4' x 8'
- SmartSeam Square: 4' x 8'
- SmartSeam Rectangle: 4' x 8'
- SmartSeam Linear: 4' x 8'
- SmartSeam Beadboard: 4' x 4'

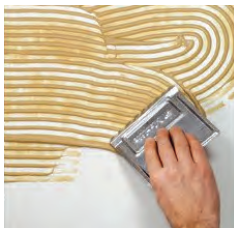

Fire Rating: Class III/C

Meets USDA/FSIS requirements

Installation

FRP panels are easily trimmed on a table saw.

Spread adhesive over the back of the panel.

Create swirl patterns on the fingerlock joints.

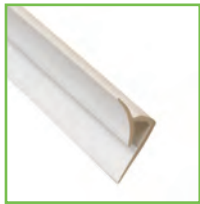

Align the finger joints and press panel to the wall.

Enjoy a seamless appearance that looks like ceramic tile.
